

New CHRIS Features

CHRIS has been updated with three new features on the Significant Adult screen. They are listed below.

- Keystrokes can now be used to select the “Lives With” and “Legal Guardian” fields on the Significant Adult screen.
- A second “Language” drop-down field is now available for each adult on the Significant Adult screen.
- A free text “Notes” field has been added to the “Email” field on the Significant Adult screen.

These improvements were made possible by user requests. As always, the Help Desk welcomes any suggestions from our users, and we thank you for your feedback.
